

Easily Control Your Hauled Waste Program

LinkoHW hauled waste tracking software efficiently manages municipal fog and septage hauled waste programs. High volume data entry and reporting is made fast and easy through intuitively designed and highly customizable software.

Hauler Inventory

LinkoHW provides a wide range of tools to help you assemble, sort, manage and report on your waste haulers.

INITIAL LIST: Track haulers by name, address, permit number, vehicles and drivers. State and local permits are easily accessed. Sort and group haulers by any data field.

VEHICLES: Track vehicle type, make, model, IDs, license #s. Access vehicle photos and notes. Look up haulers by vehicle license number or ID.

UPDATE & MAINTAIN: Add new haulers, retire or suspend haulers, modify contacts, update drivers and staff members.

DYNAMIC LISTS OF HAULERS: Quickly view sub-sets of haulers: new, active, retired and more. Displayed in a variety of reports/spreadsheets.

Manifest Tracking

Quickly manage large numbers of manifests, quantify disposal volumes and set a foundation for Cradle-to-Grave grease tracking.

DISPOSAL: Tracking Record generator, manifest ID, amount pumped, hauler company, vehicle ID, driver, date pumped, date of disposal, disposal site.

CRADLE-TO-GRAVE: Generator to disposal tracking provides a closed loop system. One click to see all pumpouts not disposed of. Ties disposals back to FOG generator in LinkoFOG.

VOLUMES: Record and tally amount disposed by type of waste, hauler, county or region, generator, time period and more for streamlined billing.

REPORTING: Generate customizable reports and letters for a variety of user defined look ups and data sets.

Activity Scheduling

Automatic scheduling ensures permit expirations, insurance requirements etc. are easily managed.

SCHEDULE: "Auto Schedule" hauler onsite and field inspections, permit renewals, certifications and insurance requirements. Produces custom field inspection forms and task lists.

ACTIVITIES & EVENTS: Manage hauler inspections, insurance requirements, permit requirements and more. Completed actions are instantly rescheduled.

VIOLATION DETECTION: User defined compliance criteria. Detection of exceedances and late requirements trigger NOV/Warning letters, follow up compliance requirements.

Violations & Enforcements

Detect violations, generate compliance plans, issue enforcement letters, and schedule compliance requirements.

DETECTION: Detects missing manifest submissions, failed onsite or field inspections, sample analysis exceedances and generates Notice of Violation (NOV) letters.

COMPLIANCE MILESTONES: Provides customizable enforcement response plan, reusable compliance plans, follow up compliance reminders.

NOV CUSTOMIZATION: Build reusable custom Notice of Violation (NOV)/warning letter templates.

VIOLATION REPORTING: Comprehensive reporting of who is in compliance, who is not, complete violation history, and escalations.

Sample & Result Analysis

Schedule, track, and evaluate sample analysis to properly identify wastes received.

ANALYSIS PARAMETERS: Track Oil and Grease, BOD, TSS, pH and Temperature, or implement your own custom parameters.

MANAGE RESULTS: Customizable data entry screens, and result import process (requires LinkoPipe) reduces/eliminates data entry time. Results are compared to compliance limits, exceedances are flagged.

VIOLATION PROCESS: Violations are detected and NOV/Warning letters are generated, follow-up compliance requirements are added to your calendar

Flexible Reporting

Customize LinkoHW stock reports and letters to match your unique reporting requirements.

REPORT CUSTOMIZATION: Easily add logos, change text and add or remove fields. This includes disposal reports, NOVs, warning letters, status reports and more.

MAIL MERGE LETTERS: Copy your MS-Word letters into LinkoHW to perform mass mailings with custom data sets.

CUSTOM DATA SETS: Filter and sort to produce custom data sets for reports. Reports are generated for any group or subset.

MS WORD & MS EXCEL: Export reports/letters to MS Word and Excel for easy modifications and distribution.

Combine LinkoHW with LinkoFOG
for Complete Cradle-to-Grave
Oil and Grease Tracking
